Relatively new services such as Video Accounts and Mini Games contributed high margin revenue streams while we re-focused away from less-scalable activities. We are increasing investment in our AI models, providing new features to our products and enhancing our targeting capabilities for both content and advertising. We aspire to position our leading AI capability not only as a growth multiplier for ourselves, but also as a value provider to our enterprise customers, and the society at large. ”

3Q2023 Financial Review

¹ Non-IFRS adjustments excludes share-based compensation, M&A related impact such as net (gains)/losses from investee companies, amortisation of intangible assets and impairment provision/(reversals), SSV & CPP, income tax effects and others

² Figures stated in USD are based on USD1 to RMB7.1798

Revenues from VAS increased by 4% to RMB75.7 billion for the third quarter of 2023 on a year-on-year basis. International Games revenues increased by 14% to RMB13.3 billion, or up 7% excluding the impact of currency movements. By title, we saw a revenue recovery for PUBG Mobile, alongside healthy revenue contributions from Goddess of Victory: NIKKE, VALORANT, and Triple Match 3D, versus decreased revenue from Tower of Fantasy, attributable to a tough comparison against its launch quarter in the same period last year. Domestic Games revenues grew by 5% to RMB32.7 billion, driven by the recent launches of Lost Ark and VALORANT, as well as increased revenues from evergreen titles such as Honour of Kings and DnF. Social Networks revenues were broadly stable at RMB29.7 billion, supported by revenue growth from music subscriptions, Mini Games platform service fees, and app-based game virtual item sales, offset by revenue declines from music-related and games-related live streaming services.

Revenues from Online Advertising were RMB25.7 billion for the third quarter of 2023, up 20% year-on-year, propelled by robust advertising demand for Video Accounts, our mobile ad network, and Weixin Search, with notable growth in the local services and FMCG categories.

Revenues from FinTech and Business Services increased by 16% year-on-year to RMB52 billion for the third quarter of 2023. FinTech Services maintained double-digit year-on-year growth, driven by increased commercial payment activities and higher revenues from wealth management services. Business Services achieved a faster year-on-year growth rate compared to the second quarter of 2023, benefitting from our cloud services restructuring undertaken in prior periods, as well as higher eCommerce technology service fees within Video Accounts.
